THE "NEVADA MONTHLY."

The Nevada Monthly for September shows improvement. J.W. Maddrill, of the Reno Journal, contributes an interesting article on "Planetary Conjunction," in which he draws a dreadful picture of the possibilities that may come to pass in June of next year, when the planets are all in line and trying to pull the axis out of the earth through the equator. There are signed Thany good things in this number. The following is the table of contents: Mining Review; The Sierra Mine, Devil's Gate District, Nevada; Then and Now, by J. If the editor of the Courier read the Atlantic, he could hardly have failed to notice that "one long short story" in exactly the phrase used by that periodical in speaking of the story referred to. EDITORIAL NOTES.

Mr. Lum, a secretary of the Nation al Greenback Labor Committee, has written a letter to Mr. Murch, the man of that Committee, asserting that Weaver, the Greenback nominee for the Presidency, is the hired agent of the Republican National Commit tee; that he has received money to prosecute the canvass for the benefit publicans that he is in short a fraud. Lum offers to produce pro fi, and the New York Herald, which prints the letter, recommends the Greenbackers to throw Weaver overboard, and take their choice between the other candidates. Indiana is the big bone of contention in this list.

> Should Garfield be elected next nonth, the country will have for President a man who has something more than a National reputation for statesmanship. In 1868 he made a speech advocating the resumption of specie payments. John Bright of England was so pleased with that speech that he had Garfield elected a member of the famous Cobden Ciub. composed of the leading British Liberals. Charles Sumner was the only other American who had ever thus been complimented. The Cobden Club, as its name implies, believed in free trade, and although Garneld was well known as a protectionist, they were glad to vote him in.

The Elko Republicans are strongly anti-Sharon. Last Summer, in County Convention, they called on him to resign. On Thursday of last week, in Convention again, they passed the fol-

inother Marvelous Invention - Transmitting articulate Sounds by Means of Light.

From the N. Y. Sun. Sept. 21.

The remarkable discovery that the luminous ray, whether of sunlight or from an artificial source, is capable of ransmitting articulate sounds, as the vire transmits them in the case of the telephone, opens the prospect of some new features of scientific operation.

This discovery formed the subject of the most striking paper read at the late meeting of the American Associa-tion for the Advancement of Science, in Beston-a peper noteworthy for the modesty of its pretensions and the magnitude of the message it conveyed. In that paper Mr. Alexander Graham Bell, famous for the telephone that bears his name, described the appa-Abraham D. Hazen, the financial ead of the Post Office Department, in letter to the Hon. Marshall Jewell.

They found that when a vibra ory beam of light falls upon certain substances, these substances emit sounds whose pitch depends upon the frequency of the vibratory change in the light. They found that in controlling the character of the light vibration, they controlled the quality of the sound, and could "obtain all varieties of srticulate speech." And the result was that the discoverers were ab'e, without a conducting wire, as in

tion to station, wherever they could project a beam of light.

Many interesting and valuable col-lateral observations were made during these experiments. It was found that sil the sound-producing effects of sun-light could also be obtained from the oxyhydrogen light, and even from a kerosene lamp. But, more extraordi-nary, when a sheet of apparently opaque hard rubber was interposed, even then a faint but perceptible muphone, thus showing, as Mr. Bell puts it that "effects are produced by forms of radient energy which are invisible." Still, he calls his invention the photophone-round by light-because an ordinary beam of light contains the are operative.

Thus far no effort has been made to nic influence, but there is no reason for doubting that it will extend as far as a beam of light can be flashed from one station to another. New vistas are thus opened of the scientific and practical uses to which this invention can be put. The world is not yet familiar with the telephone, and already its attention is called to the dawning marvels of the photophone.

A Traveller Asks For Information Just after the arrival of the overland last evening, a man stepped up to a stranger dressed in black and with a smooth-shaven face, and asked:" Are make arrangements for a Republican you a resident of these parts?"

"Insult you! No," was the reply "I merely wished to inquire when the next train leaves for Virginia. 1 just arrived from the east, and don't know

This explanation apparently mollified the gentleman, and he said:

"There's a train in the morning, I believe. Fact is, I've been living San Francisco until recently, and haven't quite got the run of things up here yet. Better ask the conduc

The inquirer stared at him in some alarm and edged away. The gentleman in black somewhat resembled Senator Sharon.

Wild ducks seem to relish the se clusion that the reservoir grants. Quite a number have been shot there already this fall. Gunners are forbidden to send dogs into the reservoir. If a man shoots a duck and it falls into the water he must wait antil the wind blows it ashore. If the wind don't blow, he must wait until the wind rises. If the wind don't rise, he must wait until the flies blow the bird to land. Under no circumstances must he send a dog in. If a dog falls in, the man mustn't go after him. The line of patient watchers in the lobby of Booth's Theater was still unbroken when the light of morning appeared, the line having remained all night. The constitution wisely forbids Congress to make any laws respecting an establishment of religion, but it is idle to hope that the nation can be protected against the influence of sectarianism while each State is exposed to its particular domination. We therefore recommend that the constitution be so amended as to lay some prohibition upon the Legis, ature of each State, and to forbid the appropriation of public funds to the support of sectarian schools.
